

## FABI INITIATIVE FEATURED IN SCIENCE MAGAZINE

FABI PhD candidate Joey Hulbert and his co-supervisor Dr Francois Roets recently published an 'Outside the Tower' piece in Science Magazine titled: Science Engagement in South Africa. The piece features a short story about how a science outreach event turned into life-changing engagement for a Grade 10 learner.

This story is one of the many unique outcomes of Cape Citizen Science, which is a FABI initiative that engages the public in research in the Western Cape Province.
