

## GRADE 12 LEARNER JOB SHADOWS AT FABI

FABI welcomes Bianca Murray, a Grade 12 learner at Moore House Academy in Johannesburg, as she makes the institute her home for the duration of her school holidays. Opting for a working vacation instead of much-deserved rest, Bianca will spend a portion of her mid-year school holidays shadowing postgraduate students at FABI to gain a better understanding of modern molecular techniques. Postgraduate students Esna du Plessis and Darryl Herron have spent some time sharing aspects of their research with Bianca, all the while bringing her closer to her dream of becoming a forensic scientist.
